90% of Brain Development Occurs by the Age of Five

Research demonstrates that a child's early experiences at home and school are critically important for their later success in life. Learn more about what DCPS offers for young children through its *Early Childhood Education Program* and *Early Intervention Services*.

Wednesday, October 28, 2009

6:30pm - 8:00pm

Francis-Stevens Education Campus

2425 N St. NW

Washington, D.C. 20037
